**MEDIA RELEASE**

**EMA INVESTIGATING ELECTRICITY SUPPLY DISRUPTION ON 18 SEPTEMBER 2018**

Electricity supply to several areas was disrupted at 0118 hours and has been fully restored on 18 September at 0156 hours.

2. The cause of the supply disruption is being investigated. The Energy Market Authority takes a serious view of disruptions to Singapore's electricity supply. We will review the outcome of our investigation before deciding on the actions to take. We will also work with the industry to put in place measures to minimise the risk of such an incident happening again.

3. We thank the public for their patience and understanding while efforts were made to restore electricity supply.
