Note:
 a. Historical values have been revised with the incorporation of new information on de-commissioned installations and reclassification of installations.
 b. Figures may not add up to total due to rounding.
 c. MWp refers to megawatt peak, which is a typical measure of the installed nameplate capacity for solar PV systems. MWp represents the amount of electric power that can be produced by a solar PV system at its peak under Standard Test Conditions (STC).
 d. MWac refers to the Alternating Current (ac) capacity of the inverters used in solar PV installations.
 e. Town Council & Public Housing Common Services refers to applicants who are from Town Councils and/or provides public housing-common services.
