Note:

- Historical values have been revised with the incorporation of new information on de-commissioned installations and reclassification of installations.
- Numbers may not add up to the totals due to rounding.
- MWp refers to megawatt peak, which is a typical measure of the installed nameplate capacity for solar PV systems. MWp represents the amount of electric power that can be produced by a solar PV system at its peak under Standard Test Conditions (STC).
- MWac refers to the Alternating Current (ac) capacity of the inverters used in solar PV installations.
- Town council & public housing common services refers to applicants who are from town councils and/or provides public housing-common services.
